

# Parse - Using the Project AI Chat

Learn how to use Pivotly to generate an automated overview of your project documents. This guide helps you identify critical data inconsistencies and gain deeper insights into your files quickly and efficiently.

## 1 Navigate to the project you want to chat with AI about

## 2 For example you could ask to find any inconsistencies in the project.

3

You are able to see the number of documents that the AI chat is looking at in the corner of the document.
